

Modulex EXT

Innovative Design. Reliable Performance.

Modulex EXT boilers deliver maximum efficiency, built-in redundancy, and space savings for your hydronic heating system. These energy-saving, whisper-quiet boilers help engineers, contractors, facility managers, and owners achieve efficiency mandates, while remaining environmentally sound. Plus, Modulex EXT offers the flexibility of installing the boilers outdoors to give you more space and versatility for your facility.

Maximize Operational Savings

High-efficiency, high-turndown heat exchangers deliver maximum fuel savings and help achieve building efficiency mandates.

Versatile Installation & Outdoor Capability

Durable enclosure allows outdoor installation with no additional accessories or modifications. Field-configurable utility and vent connections simplify retrofit in light commercial applications.

Deliver Peace of Mind

Modular design provides built-in redundancy, virtually eliminating boiler downtime and emergency service calls; the need for redundant system is significantly reduced, simplifying the design.

Eco-friendly Solution You Can Count On

The SCAQMD-certified Modulex EXT helps facilities achieve LEED status by delivering energy savings with its modular, high turndown design and 98% efficiency. Reliable operation and easy access for maintenance maximize the return on investment for facility owners and managers.

- User-friendly control panel for easy setup & menu navigation
- BAS communications via Modbus protocol
- Whisper-quiet operation <50 dBa at full fire
- 0-10V output to control primary VFD pump
- Supports room or ducted air combustion

Product Summary

- Up to 98.6% efficiency
- 8 sizes: 480 – 3000MBH
- Up to 39:1 turn down ratio
- Low NOx (<20ppm)
- Natural gas or Propane
- Small, Doorway-Size Footprint
- PP, AL-294C, cPVC or PVC vent
- Outdoor installation ready
